Re: Exide Frisco Recycling Facility, 7471 5th St., Frisco, TX 75034-5047
Interim Action Work Plan, Slag and Battery Case Fragment Removal and Disposal,
November 7, 2013, approved by TCEQ letter dated December 17, 2013

Correction to Letter Dated March 18, 2014

Dear Mr. Hyde,

On March 18, 2014 Exide Technologies (Exide) submitted a letter regarding the City of Frisco's conditions for Exide to be granted access to perform work approved by TCEQ under the *Interim Action Work Plan*. Exide wishes to correct its response to Condition #3. Exide is implementing the *Interim Action Work Plan* in accordance with TCEQ's conditional approval dated December 17, 2013, which states that soil or sediment samples should be collected from all locations in the Interim Action Area identified as containing slag and/or battery case fragments and analyzed for chemicals of concern unless data for a specific location is readily available.

We appreciate TCEQ's continued assistance in securing this access. Please contact me should you have any questions or wish to discuss this matter further.

Sincerely,

EXIDE TECHNOLOGIES

Matthew A. Love
Director, Global Environmental Remediation
