Blood Lead Testing Now Available for Residents of Frisco, TX

Frisco, TX – (November 4, 2010) – Exide Technologies has announced that testing for blood lead concentration is now available for all residents of the City of Frisco, at no charge. Exide will be responsible for all expenses incurred for the blood draw and testing. Frisco residents interested in the testing must go to the office of Dr. Vicki B. Davis at 8680 East Main Street, Suite 1E, Frisco, TX, phone number: 972-377-2447. The blood testing can be done by appointment or on a walk-in basis. Please note that walk-ins may have to wait for staff availability. Citizens will be asked to confirm their residency prior to the testing.

All blood samples will be sent by Dr. Davis to ACL Laboratories for a lead concentration analysis. Results obtained by ACL will be returned to Dr. Davis. She will contact residents to provide and discuss the results and answer any questions.

“We are offering this testing to all residents of the City of Frisco in order to provide peace of mind regarding blood lead levels,” said Don Barar, plant manager for Exide’s Frisco recycling facility. “I encourage any citizen who has a question about blood lead levels to take advantage of this testing.”

For questions regarding the testing, please contact either Dr. Davis or Susan Jaramillo at Exide, (203) 699-9133.
